● Abbreviations	3
1. BESS Degradation Curve Description.....	4
1.1 Description	4
2 BESS Degradation Curve	5
2.1 Operating Condition: 0.25P, 1 Cycle per Day	5
2.2 Operating Condition: 0.25P, 2 Cycle per Day	6
2.3 Operating Condition: 0.5P, 1 Cycle per Day.....	7
2.4 Operating Condition: 0.5P, 2 Cycle per Day.....	8

● Abbreviations

BESS	Battery Energy Storage System
COD	Commercial Operation Date
CPD	Cycle per Day
EOL	End of Life
SOH	State of Health

1. BESS Degradation Curve Description

1.1 Description

The degradation curve of a BESS describes the variation of the energy storage capacity of an energy storage system over time. As time passes, the energy storage capacity of the BESS degrades until it reaches the EOL set by the system.

For the purposes of this paper, we consider SOH at COD time to be 98.5%.

2 BESS Degradation Curve

2.1 Operating Condition: 0.25P, 1 Cycle per Day
