# Agios Theodoros — 2.64 MWp ready to build, with a 10.56 MWh four-hour battery

READY TO BUILD

CERA E004576/2024

2.64 MWp

10.56 MWh · FOUR-HOUR

LARNACA DISTRICT

SPV SHARE TRANSFER

A permitted 2.64 MWp ground-mounted park at Agios Theodoros in the Larnaca District, held in a dedicated project company and offered as a share transfer, with a 10.56 MWh four-hour battery built alongside it under a turnkey Lighthief EPC contract. This is the base-case block of Document 1 multiplied by 2.64, on the same land, under one grid connection. Yield is the Sotira south-facing PVGIS figure with bifacial gain, not a design assumption. It is the closest fit in our Cyprus pipeline to M2's ready-to-build mandate if the 5 MWp envelope is to be filled by a single new-build.

| 50% — 2025 national actual 47.4%             | 2,896 MWh        | 2,467 MWh         | €799,500        | €597,500        | 13.0%         | 7.7 yr        |
| <b>65% — 2026 national actual, base case</b> | <b>2,027 MWh</b> | <b>3,208 MWh</b>  | <b>€818,800</b> | <b>€614,900</b> | <b>13.4%</b>  | <b>7.5 yr</b> |

A less-than-one-percentage-point spread in yield across a thirty-point swing in curtailment. The four-hour battery is what makes that true.

**Two items for confirmatory diligence, which we would rather raise now than have you find.** First, permitting: the CERA licence is in place and the project has been presented as ready to build, but the planning and environmental consents were last confirmed to us in early 2026 and we are re-verifying their current status with the consultant before signature; we will not warrant ready-to-build status until that is back in writing. Second, land classification: the site is agricultural and was originally conceived as an agrivoltaic park. Law 114(I)/2026 restricts commercial renewables on agricultural and protected land, and we are confirming that the project's grandfathering under its 2024 licence and 2022 lease is unaffected. Both points are in the data room and both are conditions we expect to close before an SPA rather than after.

**Contact.** Alexander Papacosta, Managing Director · alexander.papacosta@lighthief.com · +357 99 164 158

**Basis.** Wholesale prices from published TSOC day-ahead market files, 1 Oct 2025 – 11 Feb 2026 (134 trading days, 6,432 half-hourly prints): daytime average €127/MWh, evening peak (17:00–21:00) average €183/MWh. This pack takes €175/MWh for evening capture, €8/MWh below the measured average. Curtailment base case of 65% is the published national rate for January–May 2026 (162 GWh curtailed); 2025 full year was 47.4% (306 GWh, CyprusGrid). South-facing new-build yield is 2,194 kWh/kWp · yr (PVGIS 5.3 south 31° front 2,006 at the Sotira TMY, plus +9.3% bifacial at albedo 0.25, GCR 0.45,  $\phi$  0.85, 680 Wp n-type). Margi operating uses metered 2,100. Sotira east-west is 1,806. PVsyst before commitment. Battery round-trip efficiency 87.8% AC-AC; effective capture of curtailed energy 85%, being daily-shape collection multiplied by round-trip efficiency. EPC rates €0.72/Wp (PV, turnkey) and €127,000/MWh (BESS, ex VAT) per the Lighthief EPC workbook v4, February 2026, and are indicative pending final specification and equipment pricing at the date of order. Ready-to-build site cost is €350,000/MW where an acquisition is required. Revenues are stated after a 10% aggregator and offtake fee on merchant energy and before Cyprus corporate income tax, which rose from 12.5% to 15% on 1 January 2026. Figures are unlevered and exclude VAT. Merchant exposure to a day-ahead market with under two years of published price history is the single largest uncertainty in this case; no merchant revenue is contracted.

**Disclaimer.** This document is confidential and is provided for information only under NDA LCY-NDA-M2V-2026-001. It is not an offer to sell, a solicitation to buy any security or interest, or investment advice. All figures are indicative and subject to confirmatory due diligence, final specification and site conditions. Actual results will differ. Recipients should form their own view and take their own tax, legal and technical advice. Binding figures are the downloadable Excel model available in the data room.
