AS

Dear Mr. Mitnik,

Thank you for reaching out.

pls have a look at our corporate presentation:

www.lighthief.energy/company

We would be pleased to support your family office in the Cypriot market. As a pan-European renewable energy group with operating platforms across 11+ countries, we are well positioned to assist with sourcing, technical due diligence, and the turnkey EPC/O&M award you have outlined, either as principal counterparty or as advisor on the transaction.

A few points worth flagging as you shape your Southern European strategy:

On Cyprus specifically: the market is genuinely attractive from a returns perspective, with unlevered yields on well-structured solar and BESS assets currently exceeding 10% per annum. That said, given the island's limited size and local grid and permitting constraints, the pool of fully permitted, RTB ground-mounted projects at the 5 MWp / 5 MWh scale is considerably thinner than in larger EU jurisdictions, and RTB acquisition pricing in Cyprus is currently among the highest in the EU. We are actively screening the local pipeline and will come back to you with any matching opportunities as they arise.

Beyond Cyprus: should your mandate allow flexibility across Southern and Central Europe, we are currently seeing considerably stronger risk-adjusted entry points in Poland, Italy, and Romania, where our teams are active on the ground and where RTB and near-RTB solar and BESS pipeline is both deeper and more competitively priced. We would be glad to share indicative opportunities in any or all of these markets alongside Cyprus, so you can compare on a like-for-like basis before allocating capital.

We would welcome the opportunity to discuss this further on an introductory call, at which point we can also walk you through relevant project materials for the markets of interest.

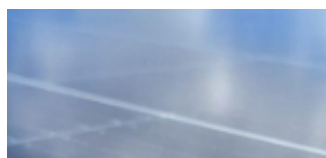

Please let us know a few time slots that would suit you, and we will arrange accordingly.

My whatsapp is 00357 960 955 90

I also attach our Cyprus senior partner and director Mr Alexander Papacosta.

Kind regards,

Arkadiusz Sybaris, PhD Eng

Dear Mr. Sybaris,

I am contacting you on behalf of our German-based family office / investment holding. We are currently looking to build up our renewable energy portfolio in Southern Europe and consider deploying capital into the Cypriot market within the next few months.

We are highly interested in acquiring fully permitted, Ready-to-Build (RTB) ground-mounted solar projects with the following core specifications:

- Target Size: up to 5 MWp (Solar Power Plant)
- Storage Component: up to 5 MWh BESS (Battery Energy Storage System)
- Grid Connection: Secured grid approval / advanced status with EAC/TSO

Our preferred strategy is to acquire the project at the RTB stage and simultaneously award the turnkey EPC and long-term O&M contracts to a tier-1 partner on the island.

Could you please let us know if you currently have matching projects in your pipeline and share the relevant investor decks with us? Upon review of the materials, we would be pleased to schedule an introductory call to discuss a potential cooperation.

Thank you very much for your time and cooperation.

Kind regards,

Stefan Mittnik
