EXECUTIVE SUMMARY

Portfolio of three fully-permitted 1 MWp solar photovoltaic projects in Podkarpackie, southeastern Poland, with secured MV grid connections. The projects feature premium Jinko N-type bifacial modules (590W), fixed-tilt mounting, and 29-year land lease agreements. All permits granted, including building permits and grid connection agreements. Expected specific yield of 1,060–1,080 kWh/kWp with competitive CAPEX at €570/kWp. Exceptional module pricing at €0.095/Wp ensures industry-leading returns with IRR of 14.9–22.8% and payback of 4.2–6.4 years. COD target Q2 2026.
