

PHOTOVOLTAIC SYSTEM — EPC CONTRACT

Lighthief Cyprus Ltd · Supply, Installation, DSO Application & Commissioning

Ref: LCY-PV-_____ Date: ____ / ____ / ____

Scheme: ☐ Net Billing (system at the served premises) ☐ Virtual Net Billing (system off-site, or in the same building as two or more premises sharing its output)

1. PARTIES

Contractor

Company	LIGHTHIEF CYPRUS LTD · Reg. HE 477423 · TIN 60187188Q
Office address	Agaristis 15, Nektaria Court, Office 201, 3045 Zakaki, Limassol, Cyprus
Registered address	Agiou Andreou 241, AG Trias Court, Flat/Office 31, 3036 Limassol, Cyprus
Contact	office@lighthief.com · 77 77 00 50 · +357 99 164 158
Represented by	Alexander Papacosta, Managing Director

Client

Name / Company	_____
ID / Reg. No.	_____ VAT No. _____
Address	_____
Email / Tel / Status	_____ ☐ Consumer ☐ Business

Served electricity account(s) — must be in the Client's name, or transferred before application.

#	Account holder	Account no.	Premises address	Allocation % (VNB)
1				
2				

2. THE SYSTEM

Installation address / plot, sheet, plan	
Load entitlement of served premises (kVA)	
Supply	☐ Single-phase ☐ Three-phase Main fuse: _____
Contracted PV capacity (kW) / Inverter AC capacity (kW)	_____ / _____
Modules — make / model / qty	
Inverter — make / model / qty	
Mounting system	
Battery storage	☐ Yes — _____ kWh / _____ kW, model: _____ ☐ No
Export limitation / Monitoring	☐ Yes — _____ kW ☐ No ☐ Monitoring — _____ ☐ No
CERA route	☐ Construction Licence / Exemption (>50 kW) ☐ Simple notification (≤50 kW)
Ripple control receiver	☐ Allowance included ☐ Quoted separately if the DSO requires it

Full specification and OEM warranty documents are at **Annex A**, which prevails over this Contract in the event of conflict.

2.1 Excluded unless listed in Annex A: structural strengthening, roof waterproofing renewal, asbestos works, earthworks, switchboard, earthing or supply-capacity upgrades, single-to-three-phase conversion, civil works, grid extension, and any permit not named in Section 4.

2.2 Capacity limits. Net Billing: up to 8 MW per account, and not more than 80% of the premises' load entitlement unless storage, export limitation, or other measures agreed with the network operators apply. Virtual Net Billing: up to 400 kWp per account and per beneficiary or enterprise, or up to 1 MW per account where energy storage is installed.

2.3 As-built tolerance. Installed capacity may exceed the approved capacity by up to +6% for systems to 10.4 kW, or +2 kW above 10.4 kW. There is no lower limit. Exceeding the maximum permitted capacity is illegal and the DSO will disconnect the system. **Capacity is frozen once the Connection Terms are issued** — any change after that is a written variation under 3.3 and may require re-application.

2.4 Sizing compliance. Systems above 10.4 kW must have total inverter capacity between 0.94x and 1.111x the installed PV capacity (DSO Technical Guide 2026.1, Annex 4). Systems to 10.4 kW are capped by the main fuse rating.

3. PRICE AND PAYMENT

Item	€
Net Contract Price (excl. VAT)	

Item	€
VAT at 19%	
Total (incl. VAT)	

Instalment	Trigger	%
1 — Deposit	On signature	30
2 — Order release	On DSO connection approval (or CERA Construction Licence for systems above 50 kW, whichever is later)	40
3 — Pre-delivery	Three working days before delivery to site	20
4 — Final	On mechanical completion and commissioning	10

3.1 Payable by bank transfer. Works begin only after the deposit clears. DSO, CERA and metering fees are passed through at cost with zero markup, invoiced as incurred, and are non-refundable once submitted.

3.2 Late payment. Business clients: the statutory rate for commercial transactions (ECB reference rate plus 8 percentage points) plus recovery costs. Consumers: 8% per annum above the ECB reference rate.

3.3 Variations. No change to scope, specification, price or capacity binds either party unless recorded in a written change order signed by both.

3.4 Price validity. Fixed for 90 days from signature provided the deposit is received within seven days.

3.5 Title and risk. Title passes on payment in full. Risk passes on delivery to site.

4. SEQUENCE AND TIMELINE

Grid approval precedes installation. The supply contract is signed after installation and inspection.

Stage	By	Target
1. Survey, sizing study, application documents (Annex B)	Both	___ wks
2. CERA Construction Licence or Exemption (>50 kW), or simple notification (≤50 kW)	☐ Contractor ☐ Client	___ wks
3. Application lodged with the DSO	Contractor	___ wks
4. DSO issues Connection and Operation Terms	DSO	—
5. Client accepts Terms and pays the connection contribution	Client	___ days
6. Equipment ordered and delivered	Contractor	___ wks
7. Installation and mechanical completion	Contractor	___ days
8. DSO inspection, connection, and Certificate of Suitability	DSO	30 cal. days
9. Client signs the supply contract with their Supplier, before two witnesses	Client	—

4.1 Twelve-month deadline. Installation, testing, connection and activation must complete within 12 months of the CERA licence (or DSO approval for systems of 50 kW or less), or the approval lapses and a fresh application is required. Where the delay is the Contractor's, the Contractor bears re-application costs; where the Client's, the Client does; where the DSO's or force majeure, costs are shared equally.

4.2 Long-stop. If mechanical completion has not occurred within _____ weeks of Stage 5 for reasons other than the Client, the DSO or force majeure, the Client may terminate and be refunded all sums paid less works performed and equipment delivered or irrevocably ordered.

5. WHAT THE CLIENT SHOULD KNOW

5.1 Approval is not guaranteed. Applications are subject to the scheme's annual capacity allocation and the local network's PV hosting limit. If refused for capacity or network reasons, this Contract terminates, DSO and CERA fees already paid are not refundable, the Contractor is entitled to its documented costs to that date, and all other sums paid are refunded within 30 days.

5.2 The supply contract runs for one year, renewing automatically unless either party gives 30 days' written notice. EAC Supply may amend its terms by notice on its website.

5.3 Export is netted, then priced. Exported energy is netted against imported energy each billing period, and only the residual is charged or credited. The purchase price for exported energy is set monthly by EAC Supply per voltage level and is materially below the retail import tariff.

5.4 Surpluses expire. Monetary surpluses are cleared each October or November and any remainder is cancelled without compensation. Surpluses are also written off on change of supplier, termination of supply, or expiry of the supply contract.

5.5 No production or savings guarantee. Yield, savings and payback figures are estimates based on modelled irradiance and the consumption data supplied. They are not warranties and form no part of this Contract.

5.6 Curtailment. Where the DSO imposes ripple control, export limitation or zero-injection, the Contractor is not liable for curtailed production.

5.7 Transfer. The supply contract cannot be assigned or transferred without the Supplier's written consent. If the property is sold or leased, raise this with the Supplier before completion.

6. CLIENT OBLIGATIONS

Unobstructed site access during working hours · disclose roof condition, waterproofing age and any undisclosed services before works begin · supply 12 months of bills or meter data for every served account before design sign-off · procure any owner, co-owner or management-committee consent needed for the installation · do not modify, reprogram or bypass any protection setting, CT clamp, export limitation or control interface without written consent · notify the Contractor if contacted by the DSO, a Supplier or CERA · report annual

production to the DSO by 31 January · notify the Supplier where installed capacity differs from approved capacity · insure the System from commissioning.

7. WARRANTIES

Item	Period from commissioning
Workmanship — electrical, mechanical, commissioning	2 years
Roof penetrations and weathertightness of Contractor's fixings	5 years
Modules	Product _____ yrs / Performance _____ yrs (OEM)
Inverter / battery	Inverter _____ yrs · Battery _____ yrs / _____ cycles / _____ % capacity (OEM)

Where the Client is a consumer, the statutory guarantee of conformity under Cyprus law implementing Directive (EU) 2019/771 applies for a minimum of two years from delivery and is not limited by this Contract.

OEM warranties are passed through and administered by the Contractor during the workmanship period; the Contractor does not underwrite OEM obligations or insolvency. Excluded: unauthorised modification, Client negligence or misuse, force majeure, external grid disturbance, normal degradation, curtailment. Where any undisputed sum is overdue the Contractor may suspend warranty service until payment; entitlement is not lost.

8. LIABILITY, FORCE MAJEURE, TERMINATION

8.1 The Contractor's total aggregate liability shall not exceed the Total Contract Price actually paid, and the Contractor is not liable for indirect or consequential loss including lost credits, expired surpluses, business interruption or revenue loss.

8.2 Nothing in this Contract limits liability for death or personal injury caused by negligence, fraud, wilful misconduct or gross negligence, or any liability that cannot lawfully be excluded, including a consumer's statutory rights.

8.3 Network damage. The Client is liable to their Supplier and the DSO for damage caused to the distribution network, including by their contractors. Where such damage results from the Contractor's negligence, the Contractor indemnifies the Client, and this indemnity is: ☐ excluded from the cap in 8.1 up to the Contractor's public liability insurance limit of € _____, or ☐ subject to the cap in 8.1.

8.4 Force majeure. Neither party is liable for failure caused by an event beyond its reasonable control. Notice within 10 days; if it continues beyond 90 days either party may terminate against payment for works performed and equipment committed.

8.5 Consumer right of withdrawal. Where this Contract is concluded away from the Contractor's premises or at a distance and the Client is a consumer, the Client may withdraw within 14 days without giving reason, under Articles 20 to 27 of the Cyprus Consumer Protection Law 112(I)/2021. If works begin at the Client's request during that period, the Client pays a proportionate amount for services supplied. The withdrawal form is at Annex C.

8.6 Cancellation after the withdrawal period. The Client pays for works performed, equipment delivered or irrevocably ordered, DSO and CERA fees already submitted, and a cancellation charge of _____ % of the remaining Net Contract Price. Any balance is refunded within 30 days. The Contractor may terminate on 14 days' written notice for unremedied material breach.

8.7 Data. Personal data of the Client and served account holders is processed for design, application and contract performance under Regulation (EU) 2016/679, and shared with the DSO, CERA, the Supplier and equipment suppliers only as necessary. Privacy notice at Annex D.

8.8 Law. Governed by the laws of the Republic of Cyprus; the courts of Cyprus have exclusive jurisdiction. A consumer Client may also refer a dispute to the Consumer Protection Service. Annexes: A Equipment Schedule · B Sizing study, single-line diagram and application documents · C Withdrawal form · D Privacy notice.
