Important: Package fees are credited toward EPC construction costs if you proceed with Lighthief as your EPC contractor. A free 30-minute initial consultation is included before any commitment.

All packages exclude third-party fees payable directly to authorities (CERA, EAC/TSO, Town Planning Department, Department of Environment, etc.) — these vary by project and are itemised separately upon application. For projects above 5 MWp or with complex grid/environmental conditions, bespoke pricing applies.

All prices are indicative and subject to confirmation following initial site review. Not a contractual offer. Lighthief may adjust pricing for atypical site complexity, access constraints, or regulatory requirements.
